CANDLE

1. CANDLE

1.1

CANDLE is a multinational, multi-centre, observational study of children with inflammatory bowel disease (IBD) in Europe. The study aims to describe the epidemiology, clinical course, and treatment of IBD in Europe. The study is led by the PRINTO network and involves the following countries: Austria, Belgium, France, Germany, Greece, Italy, Ireland, Israel, Netherlands, Poland, Portugal, Spain, Sweden, Switzerland, and the UK. The study is funded by the European Union and the PRINTO network.

1.2

CANDLE is a multinational, multi-centre, observational study of children with inflammatory bowel disease (IBD) in Europe. The study aims to describe the epidemiology, clinical course, and treatment of IBD in Europe. The study is led by the PRINTO network and involves the following countries: Austria, Belgium, France, Germany, Greece, Italy, Ireland, Israel, Netherlands, Poland, Portugal, Spain, Sweden, Switzerland, and the UK. The study is funded by the European Union and the PRINTO network.

1.3

CANDLE is a multinational, multi-centre, observational study of children with inflammatory bowel disease (IBD) in Europe. The study aims to describe the epidemiology, clinical course, and treatment of IBD in Europe. The study is led by the PRINTO network and involves the following countries: Austria, Belgium, France, Germany, Greece, Italy, Ireland, Israel, Netherlands, Poland, Portugal, Spain, Sweden, Switzerland, and the UK. The study is funded by the European Union and the PRINTO network.

1.4

CANDLE is a multinational, multi-centre, observational study of children with inflammatory bowel disease (IBD) in Europe. The study aims to describe the epidemiology, clinical course, and treatment of IBD in Europe. The study is led by the PRINTO network and involves the following countries: Austria, Belgium, France, Germany, Greece, Italy, Ireland, Israel, Netherlands, Poland, Portugal, Spain, Sweden, Switzerland, and the UK. The study is funded by the European Union and the PRINTO network.

1.5

CANDLE is a multinational, multi-centre, observational study of children with inflammatory bowel disease (IBD) in Europe. The study aims to describe the epidemiology, clinical course, and treatment of IBD in Europe. The study is led by the PRINTO network and involves the following countries: Austria, Belgium, France, Germany, Greece, Italy, Ireland, Israel, Netherlands, Poland, Portugal, Spain, Sweden, Switzerland, and the UK. The study is funded by the European Union and the PRINTO network.
