CANDLE

1. CANDLE

1.1

CANDLE is a multinational, multi-centre, observational study of children with systemic lupus erythematosus (SLE) and other autoimmune diseases. The study aims to describe the clinical course, treatment, and outcomes of these diseases in children. The study is led by the PRINTO network and involves researchers from several countries. The study is ongoing and will continue to recruit new participants.

1.2

CANDLE is a multinational, multi-centre, observational study of children with systemic lupus erythematosus (SLE) and other autoimmune diseases. The study aims to describe the clinical course, treatment, and outcomes of these diseases in children. The study is led by the PRINTO network and involves researchers from several countries. The study is ongoing and will continue to recruit new participants.
